**1. The "Green Flag" (Safe / 0% Risk)**

**Goal:** Prove the AI understands negation and doesn't flag safe text.

"Your privacy is our priority. We do not share your personal data with any third parties or affiliates. You retain 100% ownership of all content you upload. All disputes will be handled in your local municipal court, and we will never change these terms without your explicit written consent."

---

**2. The "Predatory" (Dangerous / 85-95% Risk)**

**Goal:** Prove the AI catches blatant, high-severity risks.

"We reserve the right to monetize your data by selling it to global marketing partners. By using the app, you grant us an irrevocable, worldwide, royalty-free license to use your photos for any purpose. We can modify this agreement at our sole discretion at any time. You waive your right to a jury trial and agree to binding arbitration in the Cayman Islands."

---

**3. The "Hidden" (Tricky Semantic / 60-75% Risk)**

**Goal:** Prove the AI "understands" legal meaning without using the standard keywords.

"The entity may adjust the underlying framework of these provisions without necessarily issuing a specific alert. Furthermore, the selection of forum for any potential litigation is restricted to the administrative courts of Switzerland. We do not discount the possibility of providing information to our corporate affiliates for the enhancement of user experiences."

---

**4. The "Mixed Bag" (Balanced / 66% Risk)**

**Goal:** This is the one we just analyzed. It shows the AI can ignore "good" sentences and find the "one deadly" risk.

"Welcome to LegalEase. We protect your data and will never sell it to advertisers. You are the sole owner of your uploads. Please note, however, that all disagreements must be settled through a mandatory out-of-court settlement process on an individual basis."

Welcome to ConnectApp.
Usage Data
To improve our services, we may collect usage data such as feature interactions, device type, and application performance statistics.
Account Management
We reserve the right to suspend or terminate user accounts that violate community guidelines or misuse the platform.
Camera Access
Some features may request access to your device camera to allow photo uploads and video sharing.Microphone Access
The application may request access to your microphone to enable voice messages and audio communication features.Updates to Terms
We may update certain parts of these terms periodically to improve service policies.
